

CLOSET REMIN USER BREAKS COVER!!

On this 14-year journey I always delight in telling stories just as they are! Sometimes an email arrives that blows me away. This time it's lucky to happen just before 2 major shows. Here you go:

At **Gardening Scotland 2016** I met **KEITH BRAND** who has a Degree in Crop Production Science and I know as a closet **REMIN volcanic rock dust** user. Yes, that's us in top photo – of a photo from **DUNDEE FLOWER SHOW 2011** - where he said rock dust got him **1ST PRIZE!** Here's Keith's email and photos:

Good evening Rocky Lady !!

*Just a quick email to let you know that the secret of **REMIN** is safe with me. **It definitely works as shown by my multitude of successes this season so far. I daren't tell anyone about it, it is such a great secret to have and I would be worse off without it !!***

*It works with virtually anything I grow, **DAHLIAS, ASTERS, HELICHRYSUM, SUNFLOWERS, CALENDULAS** and of course **GLADIOLI**. The stuff is brilliant and I would be grateful if you stopped advertising it everywhere !!*

To the soil, every 2nd year I use a 500 ml Greek yoghurt carton full over 6m square.

*In my home made composts same amount into approx 60 litres. I use that mix for all my **CORMLETS, PINKS, GLADIOLI SEED** and **BEGONIAS**. Everything is pricked out into same mix. All spent compost goes back in the garden. Seriously it is fantastic, I use it everywhere and it is the key to my success.*

PS: Best wishes and stop advertising the stuff. It's a real pain thinking people out there might be at the same level as me using this product !!! 31st August, 2016
